INDEX TO VOLUME VI

A

Absorption of the Eye for Ultra-Violet Radiation (Winifred P. Graham), 605.

ADAMS, ELLIOT Q.: A Comparison of the Fechner and Munsell Scales of Luminous Sensation Value, 932.

Aeronautic Instruments (Franklin L. Hunt), 744.

American Apparatus (F. K. Richtmyer), 483.

Amplifier for Direct Current (H. A. Snow), 186.

ANDERSON, J. A.: False Spectra from Diffraction Gratings, 417.

Aspherical Lens Surfaces (P. G. Nutting), 412.

Atmospheric Scattering, Sky Polarization, and Allied Phenomena (F. E. Fowle), 99.

Audion Bulbs, Effect of a Photo-Electric Material on the Thermo-Electric Current in (Theodore W. Case), 639.

B

BENFORD, FRANK: A Hemispherical Photometric Integrator, 1040.

BOVIE, W. T. and E. L. CHAFFEE: Photo-Electric Potentials from the Retina, 407.

Brilliance and Chroma (L. T. Troland and C. H. Langford), 409.

BURT, R. C. and J. B. JOHNSON: The Passage of Hydrogen Through Quartz Glass, 734.

BUTTOLPH, L. J.: A Small High Intensity Mercury Arc in Quartz-Glass, 1066.

C

CADY, F. E. and E. P. Hyde: A New Principle and its Application to the Lummer-Brodhun Photometer, 615.

CADY, W. G.: A Method of Testing Plates from Piezo-Electric Crystals, 183.

CAMPBELL, GEORGE A.: Direct Capacity Measurement, 641.

Capacity, Measurement of Direct (Geo. A. Campbell), 641.

CARMAN, ALBERT P.: A Suspension to Eliminate Mechanical Disturbances, 694.

CASE, THEODORE W.: The effect of a Photo-Electric Material on the Thermo-Electric Current in High Vacuum Audion Bulbs, 639.

CASE, THEODORE W.: Infra Red Telegraphy and Telephony, 398.

CHAFFEE, E. L. and W. T. BOVIE: Photo-Electric Potentials from the Retina, 407.

CIOFFI, P. P. and L. S. TAYLOR: A Method of Maintaining Small Objects at any Temperature Between −180°C; and +20°C, 906.

Clamp, Three-Plane Orientation (W. R. Miles), 374.

CLARK, JANET H.: A Photo-Electric Theory of Color Vision, 813.

COBLENTZ, W. W.: Recent Measurements of Stellar and Planetary Radiation, 1016.

Colorimetry (H. E. Ives), 410.

Colorimetry, Report of Committee on (L. T. Troland), 527.

Color Matching, Accuracy in (W. E. Forsythe), 410, 476.

Color Temperature (Irwin G. Priest), 410.

Color Temperature of Aluminates (Irwin G. Priest), 27.

Color Vision, A Photo-Electric Theory of (Janet H. Clark), 813.

Color, Zone Theories of (Leonard Thompson Troland), 3.

Committee Reports, Report on Atmospheric Scattering, Sky Polarization, and Allied Phenomena, 99.

Committee Reports, 1921 Report on Standard Wave-Lengths, 135.

Committee Reports, Report on Colorimetry for 1920-21, 527.

COMPTON, K. T.: A Tungsten Furnace for Experiments on Dissociation and Ionization, 910.

Corrections, 292, 661.

COX, R. T.: Standard Radio Wavemeter Bureau of Standards Type R 70B, 162.

CREW, HENRY: Helmholtz on the Doctrine of Energy, 312.

Crystelliptometer (LeRoy D. Weld), 67.

Curvature, Method for Measuring Irregularities in (Alexander Marcus), 620.

D

DAVEY, WHEELER P.: A New X-Ray Diffraction Apparatus, 413.

Dioptrics, Huygens' Contributions to (James P. C. Southall), 461.

Dispersion, Invariant Ratios and Functions in Glass (P. G. Nutting), 109.

Dispersion of Glass (T. Smith), 57.

DORSEY, HERBERT GROVE: The Phonelescope, 279.

DORSEY, N. ERNEST: An Instrument for the Gamma Ray Measurement of the

Radium Content of Weakly Active Materials, 633.
DOWEY, T. L. and HERBERT E. IVES: An Apparatus for Studying the Motion of Relays, 391.
DOYLE, E. D.: A Differential Electrodynamometer, 281.
DUSHMAN, SAUL: Some Recent Applications of the Quantum Theory to Spectral Series, 235.

E

ECKHARDT, E. A., J. C. KARCHER and M. KEISER: An Electron Tube Tuning Fork Drive, 949.
EICHLIN, C. G. and A. Q. TOOL: Some Thermal Effects Observed in Chilled Glass, 413.
Electrical Properties of Gases, Apparatus for Demonstrating (John Zeleny), 521.
Electrodynamometer, A Differential (E. D. Doyle), 281.
Electroscope, Gamma Ray (N. Ernest Dorsey), 633.
ELLIS, FREDERICK W.: The Study of Visual Processes by Means of Momentary Retinal Shadows, 922.
Energy Exchanges in the Formation of the Latent Image of a Photographic Emulsion (S. E. Sheppard and E. P. Wightman), 913.
Energy Required to Render Developable a Grain of Silver Bromide (P. S. Helmick), 998.
EPPLEY, MARION and WILLIAM R. GRAY: A Simple Direct-Reading Potentiometer for Standard Cell Comparisons, 859.
Euscope, (William G. Exton), 414.
EXTON, WILLIAM G.: Euscope, 414.
EXTON, WILLIAM G.: Turbidimeter, 414.

F

FAHRENWALD, A. W.: The Film Method of Measuring Surface and Interfacial Tension, 722.
FARWELL, H. W.: A Pocket Size Range Estimator, 269.
FARWELL, H. W.: A Simple Form of Laboratory Potentiometer, 193.
Fechner and Munsell Scales of Luminous Sensation Value (Elliot Q. Adams), 932.
FERGUSON, WALTER F. C.: Note on Mr. F. E. Wright's Article for Determining Prism Angle Errors, 108.
FERREE, C. E. and GERTRUDE RAND: Intensity and Composition of Light and Size of Visual Angle in Relation to Important Ocular Functions, 408.
FILLIUS, M. F. and LOYD A. JONES: The Relation Between Gloss and the Reflection Characteristics of Surfaces, 412.
Film on Polished Glass Surfaces (George W. Morey), 688.
FLEMING, A. P. M. and J. G. PEARCE: Research in Industry, 812.
FOOTE, PAUL D. and F. L. MOHLER: The Significance of the ½ Terms in Spectral Series Formulae, 54.
FORSYTHE, W. E.: Accuracy in Color Matchig, 410.
FORSYTHE, W. E.: Accuracy in Color Matching of Incandescent Light Sources, 476.
FORSYTHE, W. E.: Note on a Method of Increasing the Carrying Capacity of a Rheostat, 376.
FOWLE, F. E.: Report on Atmospheric Scattering, Sky Polarization, and Allied Phenomena, 99.
FOWLER, A.: Report on Series in Line Spectra, 524.
Fringes, Photography of Moving Interference (Augustus Trowbridge), 195.
Furnace, Tungsten (K. T. Compton), 910.

G

Gages, Specifications for Pressure (Frederick J. Schlink), 713, 899.
Galvanometer, Iron Clad Thomson Astatic (B. J. Spence), 696.
GARDNER, I. C.: A Field Telemeter for Approximate Surveying, 489.
GARDNER, I. C.: Constructional Data for A Cemented Objective of Barium Crown and Flint, 379.
Ghosts, Lyman (W. F. Meggers, C. C. Kiess, Carl Runge, and J. A. Anderson) 417.
Glass, Filming of (George W. Morey), 688.
Glass, The Dispersion of (T. Smith), 57.
Glass, The Manufacture of Optical, (F. E. Wright), 92.
Gloss, Characteristics of Photographic Papers (L. A. Jones), 140.
Gloss, (Loyd A. Jones and M. F. Fillius), 412.
GOULD, R. E. and L. V. JUDSON: Sieve Testing Apparatus, 719.
GRAHAM, WINIFRED P.: The Absorption of the Eye for Ultra-Violet Radiation, 605.
Graininess of Photographic Materials (Loyd A. Jones and Arthur C. Hardy), 412.

GRAY, WILLIAM R. and MARION EPPLEY: A Simple Direct-Reading Potentiometer for Standard Cell Comparisons, 859.

H

HALL, E. L. and J. L. PRESTON: A High-Voltage Storage Battery for use with Electron Tube Generators of Radio-Frequency Currents, 177.
HARDY, ARTHUR C. and LOYD A. JONES: The Graininess of Photographic Materials, 412.
Helmholtz on the Doctrine of Energy (Henry Crew), 312.
Helmholtz, Reminiscences of (M. I. Pupin), 336.
Helmholtz's Contributions to Physiological Optics (Leonard Thompson Troland), 327.
HELMICK, P. S.: On the Quantity of Light Energy Required to Render Developable a Grain of Silver Bromide, 998.
HERSCHEL, WINSLOW H.: The Drainage Error in the Bingham Viscometer, 875.
Heteromorphies (K. Horovitz), 597.
HEWLETT, C. W.: A Telephone Receiver and Transmitter, 1059.
HICKMAN, C. N.: A Variable Resistor of Low Value, 848.
HILLMAN, C. D. and CARL W. KEUFFEL: Rotating Photometric Sectors of Adjustable Transmission While in Motion, 413.
HOPKINS, B. S. & L. F. YNTEMA: Observations on the Rare Earths, XI: The Arc Spectrum of Yttrium, 121.
HOROVITZ, K.: Heteromorphies Due to the Variation of Effective Aperture and Visual Acuity, 597.
HOWES, H. L. and E. L. NICHOLS: The Blue Glow, 42, 411.
HUNT, FRANKLIN L.: Aeronautic Instruments, 744.
HYDE, E. P. and F. E. CADY: A New Principle and its Application to the Lummer-Brodhun Photometer, 615.
HYPSOMETER, A Laboratory (E. F. MUELLER and T. S. SLIGH, Jr.), 958.

I

Index to Vol. VI. 1077.
INGERSOLL, L. R.: Magnetic Rotation in Various Liquids in the Short Infra-Red Spectrum, 663.
Integraph Based on Parallel Double Tongs (Vladimir Karapetoff), 978.
IVES, HERBERT E.: A Proposed Standard Method of Colorimetry, 410.
IVES, HERBERT E.: A Theory of Intelmittent Vision, 343, 408.
IVES, HERBERT E.: Critical Frequency Relations in Scotopic Vision, 254.
IVES, HERBERT E.: The Optical Properties of a Cylindrical Enclosure with Specularly Reflecting Walls, 412.
IVES, HERBERT E. and T. L. DOWEY: An Apparatus for Studying the Motion of Relays, 391.

J

JOHNSON, J. B.: A Low Voltage Cathode Ray Oscillograph, 701.
JOHNSON, J. B. and R. C. BURT: The Passage of Hydrogen Through Quartz Glass, 734.
JONES, LOYD A.: The Gloss Characteristics of Photographic Papers, 140.
JONES, LOYD A. and ARTHUR C. HARDY: The Graininess of Photographic Materials, 412.
JONES, LOYD A. and M. F. FILLIUS: The Relation Between Gloss and the Reflection Characteristics of Surfaces, 412.
JUDSON, L. V. and R. E. GOULD: Sieve Testing Apparatus, 719.

K

KARAPETOFF, VLADIMIR: An Integraph based on Parallel Double Tongs, 978.
KARCHER, J. C., M. KEISER and E. A. ECKHARDT: An Electron Tube Tuning Fork Drive, 949.
KARRER, ENOCH: An Analysis of the Visibility Curve in Terms of the Weber Fechner Law and the Least Perceptible Brightness, 408.
KARRER, ENOCH: Recalescence in Antimony, 369.
KEISER, M., E. A. ECKHARDT, and J. C. KARCHER: An Electron Tube Tuning Fork Drive, 949.
KEUFFEL, CARL W. and C. D. HILLMAN: Rotating Photometric Sectors of Adjustable Transmission While in Motion, 413.
KIESS, C. C. and W. F. MEGGERS: False Spectra from Diffraction Gratings, 417.
